COOPERS EXHIBIT AT PERTH 07

Coopers, long time world leader in active fire and smoke curtain products has always recognised the importance of the Australian market being the first company to provide its Fire and Smoke into the Australian market back in 1992. Now Coopers have established its own Sydney based company Coopers Fire Pty Ltd. Since January 07 Coopers have had great success with prestigious installations such as the recent refurbishment works at Sydney Opera House. The October FPA/IFE Exhibition & Symposium in Perth gave Coopers a great opportunity to find out more about the proactive Fire Engineering approaches and to show the latest developments in vertical, horizontal, and insulating products.

FPA/IFE organisers' ensured delegates from all areas of fire engineering community including Regulators, Local Authorities, Brigades, Engineers, Architects, Contractors and Clients would not be disappointed. Key note speakers from around the world ensured this and quality of Exhibitors brought new products, knowledge & techniques from other world markets playing a significant part of this success.

The Coopers exhibit, featuring working models, details of the latest world's largest unsupported horizontal 2 hr Fire Curtains, the new Served Bush Fire Units, the new Virtual Fire Roller Doors, the new Insulating Fire Barriers and the new BSI PAS121:2007 attracted some serious in depth attention. A workshop lecture given by Chuck Lewis on the final day on 'Fire & Smoke Containment Curtain Systems' was very well received.

Fire & Smoke Containment Curtain Systems are not new within the Australian market, as Coopers had distributed for more than 15 years. The fresh approach is Coopers' commitment as the only manufacturer of these systems in the market, including State approvals and testing.
