COOPERS FIRST TO BE LISTED WITH BODYCOTE WARRINGTONFIRE FOR UAE PRODUCT LISTING SCHEME

Coopers is pleased to announce that it is the first and only manufacturer of fire and smoke containment systems to be listed with Bodycote Warringtonfire as suppliers to the UAE market at the time of going to press.

Bodycote Warringtonfire is the UK's largest independent fire testing, consultancy, research and certification organisation, which has a significant presence in Europe, Asia, Australia, the Middle East and North America.

Coopers insistence on maintaining its position as market leader in the UAE region by strict adherence to local regulations has resulted in its equipment being selected for many major projects currently under construction.

All Coopers' products undergo stringent third party testing prior to being released for commercial installation.

To see the full test report go to www.warringtonfire.net

For more information about Coopers products please contact Dinesh Menon at [Technofos](#) (UAE distributor).
